Modern development methods

Development Programs and Cohort Courses

WHAT IT IS

A development program combines different methods into one whole: participants do not receive a single dose of knowledge but receive it, apply it at work, review it with us and make it their own. We design the development, observe people throughout and answer for the effect. Programs we run: OrgScapes Leadership (7 and 12 days), a school for Scrum Masters, a school for Product Owners, and programs designed from scratch for one organization. All in-house; priced individually.

AT A GLANCE

Audience	HR and managers developing a group of people in one role
Led by	Kate Hobler

WHO IS IT FOR?

- After training people return to work and apply little of what they heard.
- A group in one role needs developing and you want to know who is suited to it.
- Some things, like feedback or stakeholder work, cannot be learned in a training room.
- The business wants to see an effect, not an attendance list.

WHAT YOU GET

The client receives:

- a group with structured knowledge and a shared language,
- skills practiced on real tasks between sessions,
- reliable information about each participant: whether they fit the role and what they still need,
- visible changes at work that can be reported to management.

PRICING

Priced after an initial conversation; the price depends on the number of people covered.

Prices are net, in PLN; VAT is not included. Offers in EUR or USD on request (plus 15% for exchange-rate risk and bank spread). Invoices are payable within 14 days.
